

Payment Options

We accept the following forms of payment:

- Cash
- Visa
- MasterCard
- Discover
- American Express
- Care Credit
- You must be 18 years of age or older and must show identification with payment

When do I need to pay for my pet's medical treatment?

After your pet's initial exam, you will be presented with an estimated cost for treatment. When the treatment plan has been agreed upon, we require a deposit of 100% of the low end of the estimate prior beginning diagnostics and treatments. The remaining balance will be due at the time of discharge.

Do you offer any payment plans?

We accept Care Credit as a form of payment plan. Care Credit is a Medical Loan that works similar to a credit card- this can be used for veterinary care or human dental care. We offer a 6 month NO interest plan. We also offer extended month plans of 24, 36, and 48 months which include interest. Our receptionists will be happy to assist you with applying and choosing the right plan for your needs. It does not take long to apply and a credit limit will be given immediately. See Care Credit website for more details.

www.carecredit.com (link and logo) You can also apply online yourself.

What is the cost for an emergency exam?

Our emergency exam fee is \$95.00. This is to be paid prior to seeing the Veterinarian. Any medications and treatments are additional to that. You will be presented with an estimated cost for treatment. When the treatment plan has been agreed upon, we require a deposit of 100% of the low end of the estimate prior beginning diagnostics and treatments. At the time of discharge the remaining balance will be due.

What is the cost for a consultation with our Referral Department Doctors?

Our Referral Consultation fee is \$110.00. This is for our Surgery, Internal Medicine and Critical Care Departments. Any medications and treatments are additional to that. You will be presented with an estimated cost for treatment. When the treatment plan has been agreed upon, we require a deposit of 100% of the low end of the estimate prior beginning
